1. SAFETY INFORMATION

CAUTION

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.
Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely; you should not risk trying to do so and refer the repair to a qualified service technician.

WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5). When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

2. SPECIFICATIONS

● DEH-50DH

General

Power source ..... 14.4 V DC (10.8 — 15.6 V allowable)
Grounding systgem ..... Negative type
Max. current consumption ..... 10.0 A
Dimensions (mounting size) ..... 196 (W) × 78 (H) × 138 (D) mm
[7-3/4(W) × 3-1/8(H) × 5-3/8(D) in.]
(nose) ..... 190 (W) × 74 (H) × 20 (D) mm
[7-1/2(W) × 2-7/8(H) × 3/4(D) in.]
Weight ..... 2.0 kg (4.4 lbs)

Amplifier

Continuous power output is 15W per channel min. into 4 ohms, both channels driven 50 to 15,000 Hz with no more than 5% THD.
Max. power output ..... 35 W × 4 (EIAJ)
Load impedance ..... 4 Ω (4 — 8 Ω allowable)
Preout output level/output impedance ..... 500 mV/1 kΩ
Tone controls (bass) ..... ±12 dB (100 Hz)
(treble) ..... ±12 dB (10 kHz)
Loudness contour ..... +10 dB (100 Hz), +6.5dB (10 kHz)
(Volome: –30 dB)

CD player

System ..... Compact disc audio system
Usable discs ..... Compact disc
Signal format ..... Sampling frequency: 44.1 kHz
Number of quantization bits: 16; linear
Frequency Characteristics ..... 5 — 20,000 Hz (±1 dB)
Signal-to-noise ratio ..... 94 dB (1 kHz) (IHF-A network)
Dynamic Range ..... 90 dB (1 kHz)
Number of channels ..... 2 (stereo)

FM tuner

Frequency range ..... 87.9 — 107.9 MHz
Usable sensitivity ..... 11 dBf(1.0 µV/75 Ω, mono, S/N:30 dB)
50 dB quieting sensitivity ..... 16 dBf (1.7 µV/75 Ω, mono)
Signal-to-noise ratio ..... 70 dB (IHF-A network)
Distortion ..... 0.3% (at 65 dBf, 1 kHz, stereo)
Frequency response ..... 30 — 15,000 Hz (±3 dB)
Stereo separation ..... 40 dB (at 65 dBf, 1 kHz)
Selectivity ..... 70 dB (2ACA) (±400 kHz)
Tree-signal intermodulation (desire signal level)
..... 50 dBf (two undesire signal level: 110 dBf)

AM tuner

Frequency range ..... 530 — 1,710 kHz
Usable sensitivity ..... 18 µV (25 dB) (S/N: 20 dB)
Selectivity ..... 50 dB (±10 kHz)

These specifications were determined and are presented in accordance with specification standards established by the Ad Hoc Committee of Car Stereo Manufacturers.

Note:
Specifications and the design are subject to possible modification without notice due to improvements.

● DEH-40DH

General

Power source ..... 14.4 V DC (10.8 — 15.6 V allowable)
Grounding system ..... Negative type
Max. current consumption ..... 10.0 A
Dimensions (mounting size) ..... 196 (W) × 78 (H) × 135 (D) mm
[7-3/4(W) × 3-1/8(H) × 5-3/8(D) in.]
(nose) ..... 190 (W) × 74 (H) × 20 (D) mm
[7-1/2(W) × 2-7/8(H) × 3/4(D) in.]
Weight ..... 2.0 kg (4.4 lbs)

Amplifier

Continuous power output is 15W per channel min. into 4 ohms, both channels driven 50 to 15,000 Hz with no more than 5% THD.
Max. power output ..... 35 W × 4 (EIAJ)
Load impedance ..... 4 Ω (4 — 8 Ω allowable)
Preout output level/output impedance ..... 500 mV/1 kΩ
Tone controls (bass) ..... ±12 dB (100 Hz)
(treble) ..... ±12 dB (10 kHz)
Loudness contour ..... +10 dB (100 Hz), +6.5dB (10 kHz)
(Volome: –30 dB)

CD player

System ..... Compact disc audio system
Usable discs ..... Compact disc
Signal format ..... Sampling frequency: 44.1 kHz
Number of quantization bits: 16; linear
Frequency Characteristics ..... 5 — 20,000 Hz (±1 dB)
Signal-to-noise ratio ..... 94 dB (1 kHz) (IHF-A network)

AM tuner

Frequency range ..... 530 — 1,710 kHz
Usable sensitivity ..... 18 µV (25 dB) (S/N: 20 dB)
Selectivity ..... 50 dB (±10 kHz)

These specifications were determined and are presented in accordance with specification standards established by the Ad Hoc Committee of Car Stereo Manufacturers.

Note:
Specifications and the design are subject to possible modification without notice due to improvements.

3. DISASSEMBLY

● Removing the Case

1.Remove the three screws A , and then remove the case.

● Removing the Panel Assy

1.Remove the three screws B.

2.Disconnect the five stoppers C , and then remove the panel assy.

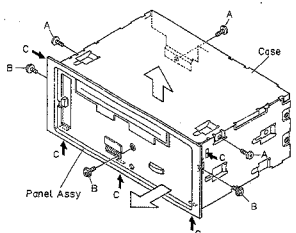

Fig.1

● Removing the CD Mechanism Module

1.Remove the four screws D.

2.Disconnect the connector indicated by arrow.

3.Remove the CD Mechanism Module.

● Removing the Bracket

1.Remove the four screws E , and then remove the bracket.

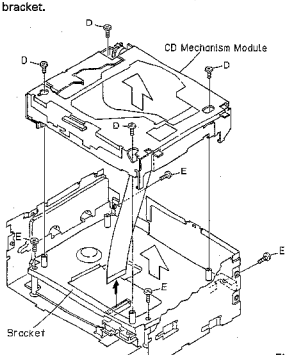

Fig.2

● Removing the Equalizer Unit(DEH-50DH)

1.Stretch the two claws F , and then remove the equalizer unit.

● Removing the Tuner Amp Unit

1.Remove the four screws.

2.Stretch the four claws G , and then remove the tuner amp unit.

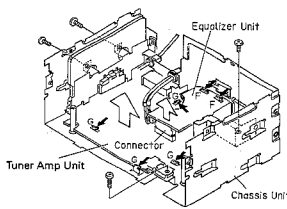

Fig.3

4. ADJUSTMENT

4.1 CD PLAYER SECTION

1)Precautions

- This unit uses a single power supply (+5V) for the regulator. The signal reference potential, therefore, is connected to REFO(approx. 2.5V) instead of GND.
  If REFO and GND are connected to each other by mistake during adjustments, not only will it be impossible to measure the potential correctly, but the servo will malfunction and a severe shock will be applied to the pick-up. To avoid this, take special note of the following.
  Do not connect the negative probe of the measuring equipment to REFO and GND together. It is especially important not to connect the channel 1 negative probe of the oscilloscope to REFO with the channel 2 negative probe connected to GND.
  Since the frame of the measuring instrument is usually at the same potential as the negative probe, change the frame of the measuring instrument to floating status.
  If by accident REFO comes in contact with GND, immediately switch the regulator or power OFF.

- Always make sure the regulator is OFF when connecting and disconnecting the various filters and wiring required for measurements.

- Before proceeding to further adjustments and measurements after switching regulator ON, let the player run for about one minute to allow the circuits to stabilize.

- Since the protective systems in the unit's software are rendered inoperative in test mode, be very careful to avoid mechanical and /or electrical shocks to the system when making adjustment.

- Test mode starting procedure
  Switch ACC, back-up ON while pressing the **4** and **6** keys together.

- Test mode cancellation
  Switch ACC, back-up OFF.

- Disc detection during loading and eject operations is performed by means of a photo transistor in this unit.Consequently, if the inside of the unit is exposed to a strong light source when the outer casing is removed for repairs or adjustment, the following malfunctions may occur.
  *During PLAY, even if the eject button is pressed,the disc will not be ejected and the unit will remain in the PLAY mode.
  *The unit will not load a disc.
  When the unit malfunctions this way, either reposition the light source, move the unit or cover the photo transistor.

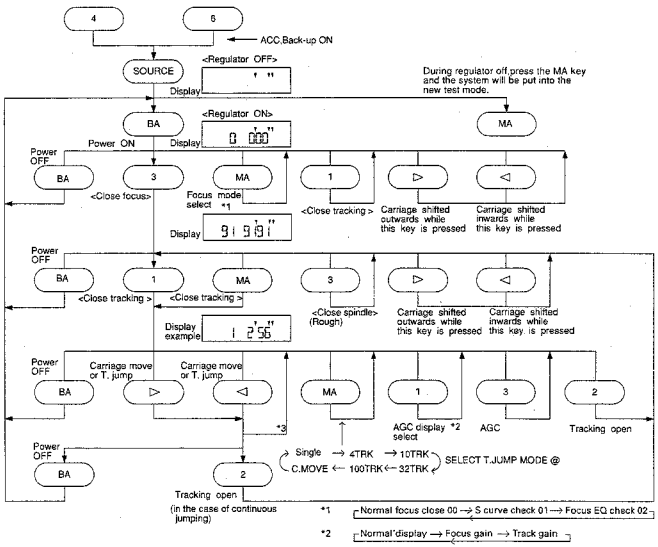
- When loading and unloading discs during adjustment procedures, always wait for the disc to be properly clamped or ejected before pressing another key. Otherwise, there is a risk of the actuator being destroyed.

- Turn power off when pressing the button ▷ or the button ◁ key for focus search in the test mode. (Or else lens may stick and the actuator may be damaged.)

- SINGLE/4TRK/10TRK/32TRK will continue to operate even after the key is released.Tracking is closed the moment C-MOVE is released.

- JUMP MODE resets to SINGLE as soon as power is switched off.

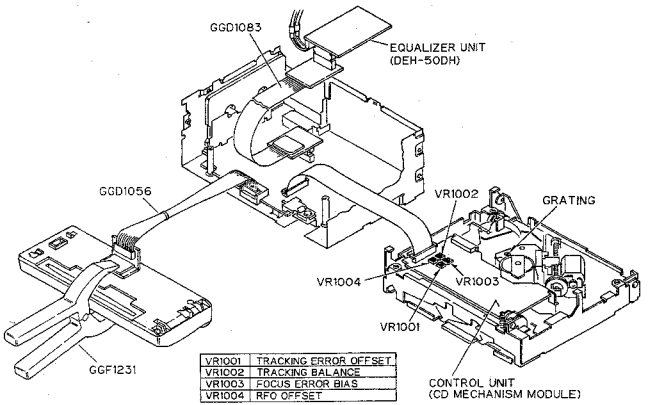
● Flow Chart



● Measuring Equipment and Jigs

Adjustment	Measuring equipment & jigs
1 Tracking Error Offset Adjustment 1	DC V Meter
2 Grating Check / Adjustment 1	Oscilloscope, ABEX TCD-784 (or SONY TYPE 4), Two L.P.F., Clock Driver
3 Grating Adjustment 2	Oscilloscope, Grating Adjustment Filter (B.P.F.), mV Meter, ABEX TCD-784 (or SONY TYPE 4), Two L.P.F., Clock Driver
4 Tracking Balance Adjustment 1	Oscilloscope, Low-pass Filter, ABEX TCD-784 (or SONY TYPE 4)
5 Focus Bias Adjustment	Oscilloscope, ABEX TCD-784 (or SONY TYPE 4)
6 RFO Offset Adjustment	Oscilloscope, ABEX TCD-784 (or SONY TYPE 4)
7 Tracking Error Offset Adjustment 2	DC V Meter
8 Tracking Balance Adjustment 2	Oscilloscope, Low-pass Filter, ABEX TCD-784 (or SONY TYPE 4)

● **Adjustment Point**



VR1001	TRACKING ERROR OFFSET
VR1002	TRACKING BALANCE
VR1003	FOCUS ERROR BIAS
VR1004	RFO OFFSET

Fig.4

● **Test Point**

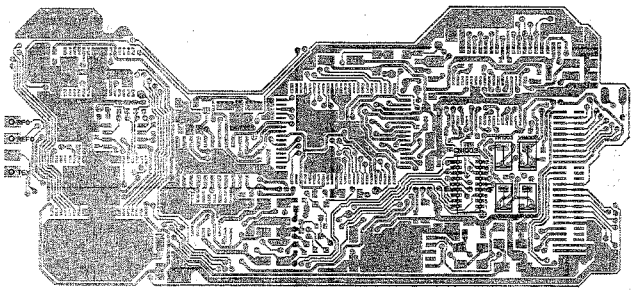


Fig.5

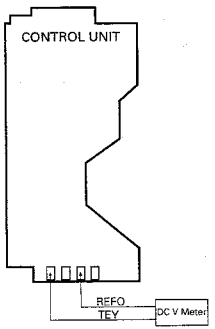
1 Tracking Error Offset Adjustment 1

·Purpose :
To adjust the offset of the tracking pre-amp to zero.
·Symptoms of Mal-adjustment :
Track search NG, Carriage runaway, Poor playability.

·Measuring Equipment / Jig	·DC V Meter
·Measuring Point	·TEY
·Test Disc , Mode	·TEST MODE
·Adjustment Point	·VR1001(TE OFFSET VR)

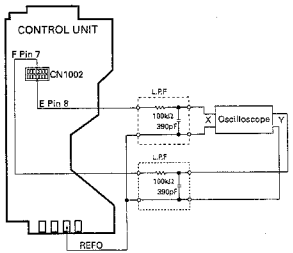


Adjustment Procedure
1.Switch the regulator on.
Select Focus EQ check in Focus mode by pressing key MA. And the indication 00 will change to 02.
This mode makes the laser turned off.
2.Using VR1001, adjust TEY to 0 ± 25mV w.r.t. REFO.

2 Grating Check / Adjustment 1

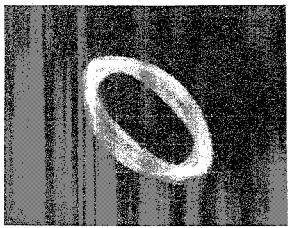
·Purpose :
To check that the PU grating is correctly aligned after the PU unit has been replaced.
·Symptoms of Mal-adjustment :
Unable to play disc, track skip during search, search NG.

·Measuring Equipment / Jig	·Oscilloscope, Two L.P.F., Clock Driver
·Measuring Point	·E, F
·Test Disc , Mode	·ABEX TCD-784 (or SONY TYPE 4), TEST MODE
·Adjustment Point	·Grating hole



Adjustment Procedure
1.Load disc and switch regulator on.
2.Position the PU in the center of the disc using the ▷ & ◁ keys.
3.Press key 3 to close focus and press once more to close spindle.
4.Refering to the photographs given check that the grating is within ±45°. If not, it should be possible to make a fine adjustment to the grating by slowly tuning the grating screw. If, however during the adjustment the lissajous figure is seen to "FLIP" then the null point must be found and the adjustment made from there(see next section).

Lissajous figure (AC input)
Horizontal axis E 10mV/div.
Vertical axis F 10mV/div.

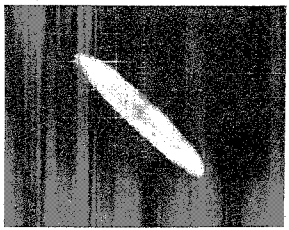


60°=NG

Waveform 1

45°=OK
(Limit)

Waveform 2



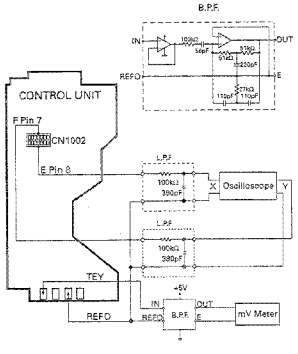
0°=BEST
(Doesn't become a single line due to eccentricity)

Waveform 3

3 Grating Adjustment 2

·Purpose :
This needs to be done if the previous adjustment was unsuccessful.
·Symptoms of Mal-adjustment :
Unable to play disc, track skipping, track search NG.

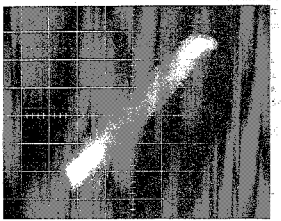
·Measuring Equipment / Jig	·Oscilloscope, Grating Adjustment filter (B.P.F.), mV Meter, Two L.P.F., Clock Driver
·Measuring Point	·TEY, E, F
·Test Disc , Mode	·ABEX TCD-784 (or SONY TYPE 4), TEST MODE
·Adjustment Point	·Grating hole



Adjustment Procedure

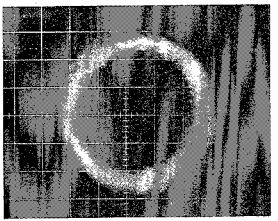
1. Load disc and switch regulator on.
2. Position the PU unit in the center of the disc using the ▷ & ◁ keys.
3. Press key **3** to close focus and press once more to close spindle.
4. While monitoring the output of the B.P.F. connected to TEY, slowly turn the grating screw. The output voltage should pass through many minimums; search for the minimum which is clearly smaller than the rest - this is the "null point", where the E & F sub-beams are lined up with the tracks on the disc.
5. From this null point, turn the grating screw clockwise (as seen from the underside of the PU unit) until the lissajous waveform is a single line (or close as possible) as shown in the photograph.

Lissajous figure (AC input)
Horizontal axis E 10mV/div.
Null Point=180° Vertical axis F 10mV/div.



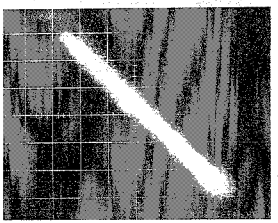
Waveform 4

"Rough" adjustment=90°



Waveform 5

Final adjustment=0°

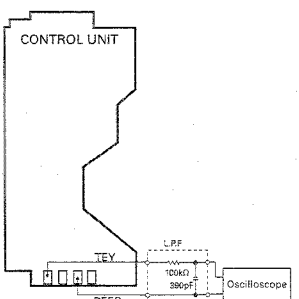


Waveform 6

4 Tracking Balance Adjustment 1

Purpose :
To equate the sensitivity of the F channel to that of the E channel.
Symptoms of Mal-adjustment :
Track search NG, Poor playability carriage runaway.

Measuring Equipment / Jig	Oscilloscope, L.P.F.
Measuring Point	TEY
Test Disc , Mode	ABEX TCD-784 (or SONY TYPE 4), TEST MODE
Adjustment Point	VR1002 (T.BAL VR)



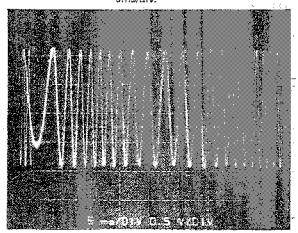
Adjustment Procedure
1. Load disc and switch the regulator on.
2. Position the PU unit in the center of the disc using the ▷ & ◁ keys.
3. Close focus by pressing key 3.
4. Observing the TEY waveform on the oscilloscope, adjust VR1002 until the positive and negative halves have the same amplitude (see waveform 7–9).

Check
After adjustment the TEY waveform should have an amplitude of 1.5±0.65 Vpp.
(ABEX TCD-784 or SONY TYPE 4)
(Providing focus bias is OK)

DC Mode
0.5V/div.
5ms/div.

+5% NG

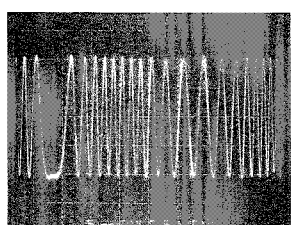
REFO



Waveform 7

±0% OK

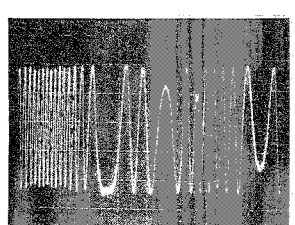
REFO



Waveform 8

−5% NG

REFO

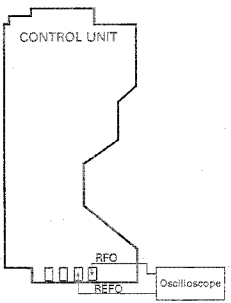


Waveform 9

5 Focus Bias Adjustment

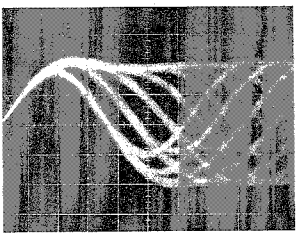
Purpose :
To adjust the focus servo reference so that the RF waveform is an optimum.
Symptoms of Mal-adjustment :
Difficulty in closing focus, poor playability.

Measuring Equipment / Jig	· Oscilloscope
Measuring Point	· RFO
Test Disc , Mode	· ABEX TCD-784 (or SONY TYPE 4), NORMAL MODE
Adjustment Point	· VR1003 (FE BIAS VR)



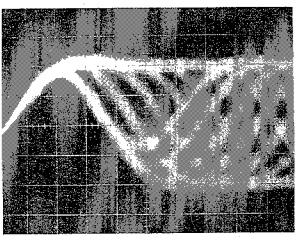
Adjustment Procedure
1. Play track number 18.
2. Adjust VR1003 so that the RFO waveform amplitude is a maximum and eye pattern is optimum.

Check
After adjustment the RFO waveform should have an amplitude of 1.7±0.85 Vpp.
(ABEX TCD-784 or SONY TYPE 4)



OK

Waveform 10



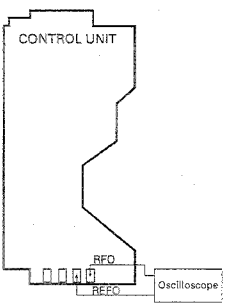
NG

AC Mode Before adjustment Waveform 11

6 RFO Offset Adjustment

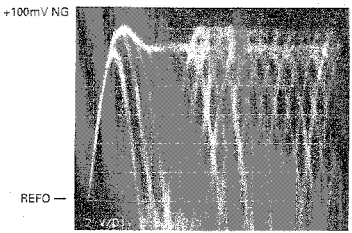
·Purpose
To adjust the RFO waveform offset to an optimum.
·Symptoms of Mal-adjustment
Difficulty in closing focus, poor playability.

·Measuring Equipment / Jig	·Oscilloscope
·Measuring Point	·RFO
·Test Disc , Mode	·ABEX TCD-784 (or SONY TYPE 4), NORMAL MODE
·Adjustment Point	·VR1004 (RFO OFFSET VR)

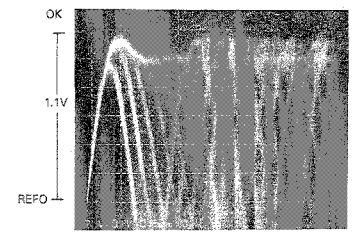


Adjustment Procedure
1. Play track number 18.
2. Adjust VR1004 so that the peak value of the upper envelope of the RFO waveform is at +1.1VDC w.r.t. REFO(See waveform 12-14).

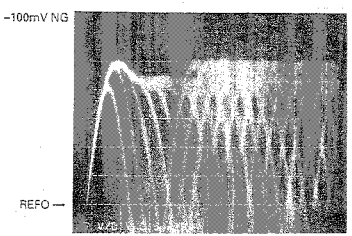
DC Mode
0.2V/div.
0.5μs/div.



Waveform 12



Waveform 13

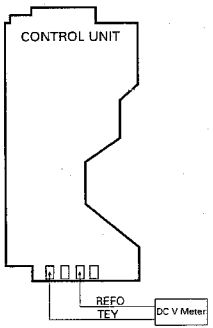


Waveform 14

7 Tracking Error Offset Adjustment 2

·Purpose :
To check the offset of the tracking pre-amp is zero and adjust if necessary.
·Symptoms of Mal-adjustment :
Track search NG, Carriage runaway, Poor playability.

·Measuring Equipment / Jig	·DC V Meter
·Measuring Point	·TEY
·Test Disc , Mode	·TEST MODE
·Adjustment Point	·VR1001(TE OFFSET VR)

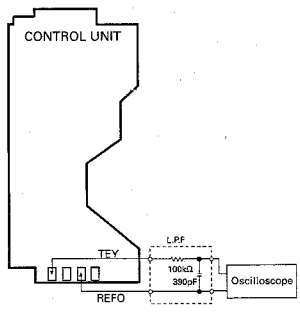


Adjustment Procedure
1.Switch the regulator on.
Select Focus EQ check in Focus mode by pressing key MA. And the indication 00 will change to 02.
This mode makes the laser turned off.
2.Using VR1001, adjust TEY to 0 ± 25mV w.r.t. REFO.

8 Tracking Balance Adjustment 2

·Purpose :
To equate the sensitivity of the F channel to that of the E channel.This needs only be done if the TE OFF-SET volume was re-adjusted in the previous step.
·Symptoms of Mal-adjustment:
Track search NG,Poor playability, carriage runaway.

·Measuring Equipment / Jig	·Oscilloscope, L.P.F.
·Measuring Point	·TEY
·Test Disc , Mode	·ABEX TCD-784 (or SONY TYPE 4), TEST MODE
·Adjustment Point	·VR1002 (T.BAL VR)



Adjustment Procedure
1.Load disc and switch the regulator on.
2.Position the PU unit in the center of the disc using the ▷ & ◁ keys.
3.Close focus by pressing key 3.
4.Observing the TEY waveform on the oscilloscope, adjust VR1002 until the positive and negative halves have the same amplitude (See waveform 7–9).
Check
After adjustment the TEY waveform should have an amplitude of 1.5±0.65 Vpp.
(ABEX TCD-784 or SONY TYPE 4)

4.2 TUNER SECTION

● **Connection Diagram**

NOTE:
Select C1 so that total capacity of 80pF is attained from the direction of the receiver jack.
Z: Output impedance of SSG.

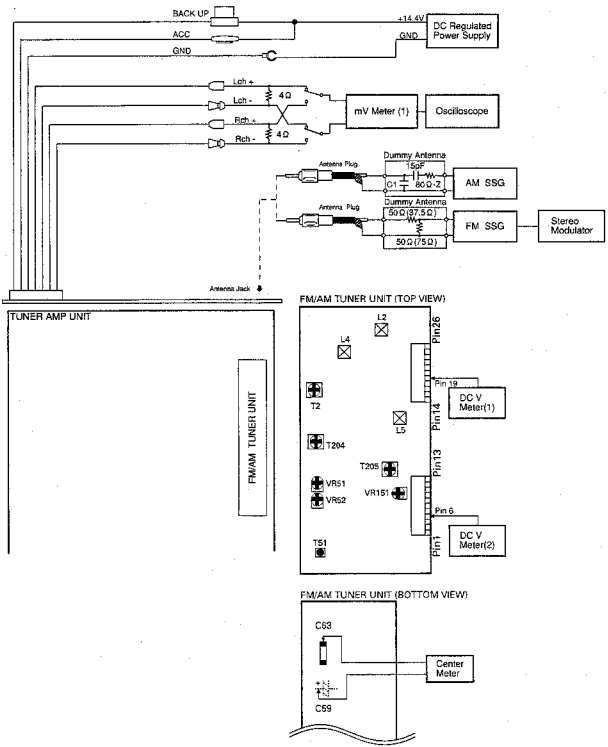


Fig.6

AM ADJUSTMENT

	No.	AM SSG(400Hz,30%) Frequency(kHz)	AM SSG(400Hz,30%) Level(dBμV)	Displayed Frequency(kHz)	Adjustment Point	Adjustment Method (Switch Position)

SD	1	98.1 S	22	98.1	VR51	DC V Meter(2) : Approx. 5V

5. ERROR NUMBERS AND NEW TEST MODE

● Error Number Indication

If the CD should fail to operate or if an error has taken place during operation the player will enter into the error mode, and the cause of the error will be numerically indicated.

This is aimed at assisting in analysis or repair.

(1) Examples of Display

·E- XX

(2) Error Codes

Error Code	Classification	Description	Cause/Detail
10	ELECTRIC	Carriage home failure	Carriage doesn't move to or from the innermost position →Home switch failed and/or carriage immobile
11	ELECTRIC	Focus failure	Focus failed →Defects, disc upside-down, severe vibration
12	ELECTRIC	Spindle lock failure Subcode failure	Spindle failed to lock or subcode unreadable →Spindle defective, defect, severe vibration
14	ELECTRIC	Mirror failure	Unrecorded CD-R The disc is upside-down, defects, vibration
17	ELECTRIC	Set up failure	AGC protect failed →Defects, disc upside-down, severe vibration
30	ELECTRIC	Search time out	Failed to reach target address →Carriage/tracking defective and/or defects
A0	SYSTEM	Power failure	Power overvoltage or short circuit detected →Switching transistor defective and/or power abnormal

● New Test Mode(aging operation and setup analysis)

The single CD player plays in normal mode. After being set up, it will display FOK (focus), LOCK (spindle), subcode, sound skip, protection against a mechanical error or the like, occurrence of an error, cause and time of an expiry, if any, (and disk number)

During the setup, the CD software operation status (internal RAM and C-point)is displayed.

(1) How to enter NEW TEST Mode

See the test mode flow chart Page 5.

(2) Relations of keys between TEST and NEW TEST Modes

Keys	Test Mode		New Test Mode	
	Regulator OFF	Regulator ON	PLAY in progress	Error Occurred, Protection Activated
BAND	Regulator ON	Regulator OFF	—	Time of occurrence / cause of error select
>	—	FWD-Kick	TRACK UP / FF	—
<	—	REV-Kick	TRACK DOWN /REV	—
1	—	Tracking close	SCAN	—
2	—	Tracking open	MODE	—
3	—	Focus close	—	—
MA	To New Test Mode	Focus Mode Select	AUTO/MANU	TRACK No. / time of occurrence select

Operations,such as EJECT, CD ON/OFF, etc. are performed normaliy

(3) Error Cause (Error Number) Code

Error Code	Classification	Mode	Description	Cause	Detail
40	ELECTRIC	PLAY	FOK=L	Put out of focus	Scratch, Stain, Vibration, Servo defect, etc...
41	ELECTRIC	PLAY	LOCK=L 100ms	Spindle unlock	
42	ELECTRIC	PLAY	Subcode unacceptable 500ms	Failed to read subcode	
43	ELECTRIC	PLAY	Sound skipped	Last address memory operated	

(4) Indicating an Operation Status During Setup

Status No.	Description	Protection operation
01	Carriage home mode started	None
02	Carriage moving inwards	10-second time out, Home switch failed
03	Carriage moving outwards	10-second time out, Home switch failed
05	Carriage moving outwards	None
11	Setup started	None
12	Spindle turn/Focus search started	None
13	Waiting for focus closure (XSI=L)	Failure to close focus
10,14	Waiting for focus closure (FOK=H)	Failure to close focus
15, 16, 17	Focus closed, Tracking open	Focus disrupted
18	During focus AGC Subcode waiting	Focus disrupted
19	During tracking AGC	Disrupted focus
20	Waiting for MIRR, LOCK or subcode read Carriage closed, SPINDLE=ADAPTIVE	Focus disrupted, MIRR NG, Failure to lock, Failed to read subcode

5) Example of Display.

·SET UP in progress(When manual)

·Operation (PLAY, SEARCH, etc.) in progress perfectly identical with that in the normal mode.

·Protection/Error upon occurrence

(a) Error number indicated

Select the display with the BAND key.

(b) Track number and absolute time indicated

Select the display with the MA key.

61	NC			Not used
62	BSENS	I		Back up power sense input
63	ASENS	I		ACC power sense input
64	PDI	I		Data input from PLL IC
65	PDO	O	C	Data output for PLL IC
66	PCK	O	C	Serial clock output for PLL IC
67	PCE	O	C	Chip enable output for PLL IC
68	VDD			Power supply
69	X2			Crystal oscillator connection pin
70	X1			Crystal oscillator connection pin
71	IC			Connect to VSS
72	XT2			Crystal oscillator connection pin
73	TESTIN	I		Test program start input
74	AVDD			Positive power supply terminal for analog circuit
75	AVREFO	I		Reference voltage input for A/D converter
76	SL	I		SD level input from tuner
77	TEMP	I		Temperature detector
78	DINC	I		Disc insert sense input
79	EJTD	I		Disc eject position sense input
80	LEVEL	I		Level/spectrum analyzer display level input

I/O Format	Meaning
C	C MOS
N	N channel open drain

IC's marked by are MOS type.*
Be careful in handling them because they are very liable to be damaged by electrostatic induction.

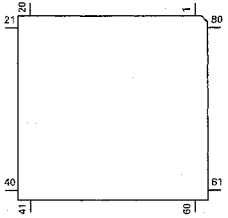
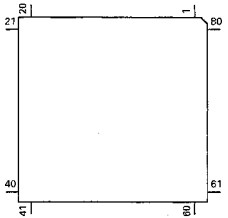
*PD4582A(DEH-40DH)



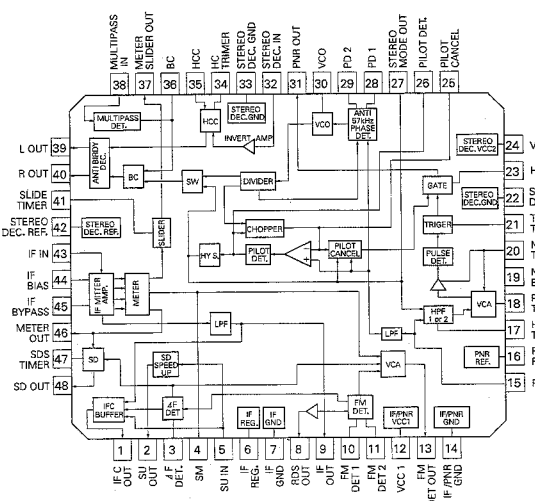
*PD6155A



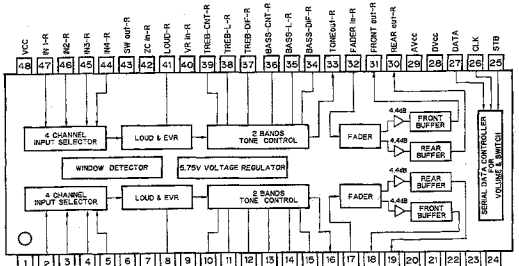
● **Pin Functions (PD6155A)**

Pin No.	Pin Name	I/O	Function and Operation
1	VSS		GND
2	X1		Crystal oscillator connection pin
3	X0		Crystal oscillator connection pin
4	NC		Not used
5,6	MOD1,0	I	Connect to GND
7	NC		Not used
8	KYDT	O	Display/key data output
9	DPDT	I	Display/key data input
10	REMIN	I	Remote control pulse input
11,12	NC		Not used
13-16	KD4-KD1	I	Key data input
17-21	KS6-KS2	O	Key strobe output
22	NC		Not used
23	VDD		VDD
24-73	SEG0-49	O	LCD segment output
74-77	COM3-0	O	LCD common output
78	VLCD	I	LCD voltage input
79,80	V2,V1		Power supply terminal

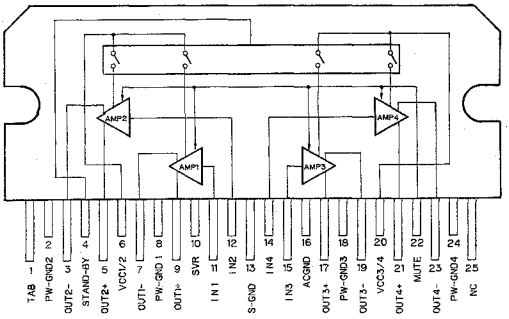
PA2022B



SN761025DL



PAL003A

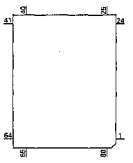


● **Pin Functions(UPD63700GF1)**

Pin No.	Pin Name	I/O	Function and Operation
1	D.GND		Logic circuit GND
2	RFOK	O	RFOK detection signal output terminal
3	MIRR	O	MIRR detection signal output terminal
4	TBC	I	Tracking filter bank switching terminal
5	HOLD	I	Hold control signal input terminal
6	D.VDD		VDD for logic circuit
7	$\overline{RST}$	I	System reset
8	AO	I	Control signal distinguishing data from microcomputer
9	$\overline{STB}$	I	Signal latching serial data inside LSI
10	$\overline{SCK}$	I	Clock input terminal for serial data input and output
11	SO	O	Serial data and status signal output
12	SI	I	Serial data input
13	TM2	I	Double speed playback control terminal
14	D.GND		Logic circuit GND
15	TEST	I	Test terminal
16	STBY	I	Stand-by input terminal
17	CTLV	I	Control terminal for clock generation VCO used by digital PLL in double speed playback mode
18	POUT	O	Output terminal for phase comparison between EFM signal and bit clock
19	D.GND		Logic circuit GND
20	VCO	I	Inverter input
21	$\overline{VCO}$	O	Inverter output
22	D.VDD		VDD for logic circuit
23	PLCK	O	Bit clock monitor terminal
24	LOCK	O	"H" when synchronization signal and frame counter output coincide at EFM demodulator
25	WFCK	O	Signal issuing one-frame period by bit clock dividing signal
26	RFCK	O	Oscillation clock divider signal,output pin for signal giving 1-frame sync.
27	C4M	O	Output terminal for signal having four the frequency of LRCK
28	C16M	O	Oscillation clock output terminal
29	D.GND		Logic circuit GND
30	XTAL	I	Oscillation continuation terminal
31	$\overline{XTAL}$	O	Oscillation continuation terminal
32	D.VDD		VDD for logic circuit
33	SCKO	O	Clock output terminal for audio serial data
34	LRCK	O	Signal distinguishing between left and right channel DOUT terminal output
35	DOUT	O	Serial audio data output terminal
36	TX	O	Digital audio interface data output terminal
37	FLAG	O	Flag signal indicating that the current audio data output of incorrectable data
38	EMPH	O	Emphasis information output
39	WDCK	O	Output terminal for signal having double the frequency of LRCK
40	C2D3	O	Output terminal indicating C2 error correction status
41	SFSY	O	Signal indicating subcode one-frame synchronization
42	SBSY	O	Signal indicating head of subcode block
43	SBSO	O	Subcode data output terminal
44	SBCK	I	Subcode data read clock input terminal
45	D.GND		Logic circuit GND
46,47	C1D1,C1D2	O	Output terminal indicating C1 error correction status
48,49	C2D1,C2D2	O	Output terminal indicating C2 error correction status
50	T4	I	Selects between focus and tracking modulation mode
51	T5	I	Selects motor PWM output mode
52	T6	I	Sets focus PWM output mode
53	T7	I	Sets tracking PWM output mode
54	D.VDD		VDD for logic circuit
55	MRD	O	PWM negative output terminal for the spindle loop filter
56	MFD	O	PWM positive output terminal for the spindle loop filter
57	SRD	O	PWM negative output terminal for the thread loop filter
58	SFD	O	PWM positive output terminal for the thread loop filter

Pin No.	Pin Name	I/O	Function and Operation
59	D.GND		Logic circuit GND
60	TRD	O	PWM negative output terminal for the tracking loop filter
61	TFD	O	PWM positive output terminal for the tracking loop filter
62	FRD	O	PWM negative output terminal for the focus loop filter
63	FFD	O	PWM positive output terminal for the focus loop filter
64	D.VDD		VDD for logic circuit
65	OUTSEL	I	Sets PWM output mode for the motor system
66	TEC1	I	Tracking error input terminal
67	TEC0	I	Tracking error input terminal
68	A.VDD		VDD for analog circuit
69,70	VR2,VR1	I	A/D converter input
71	TE	I	Tracking error input terminal
72	FE	I	Focus error input terminal
73	RFB	I	RFB signal input terminal
74	RFP	I	RFP signal input terminal
75	A.GND		Analog circuit GND
76	REFOUT	O	A/D converter midpoint voltage output terminal inside LSI
77	RFI	I	RF signal input terminal for EFM comparator
78	ASI	I	Level comparing input for RF signal comparison
79	EFM	O	EFM signal output terminal
80	A.VDD		VDD for analog circuit

*UPD63700GF1



6. ELECTRICAL PARTS LIST

NOTE:

- Parts whose parts numbers are omitted are subject to being not supplied.
- The part numbers shown below indicate chip components.

Chip Resistor

RS1/OSOOOJ,RS1/OOSOOOJ

Chip Capacitor (except for COS.....)

CKS....., CCS....., CSZS.....

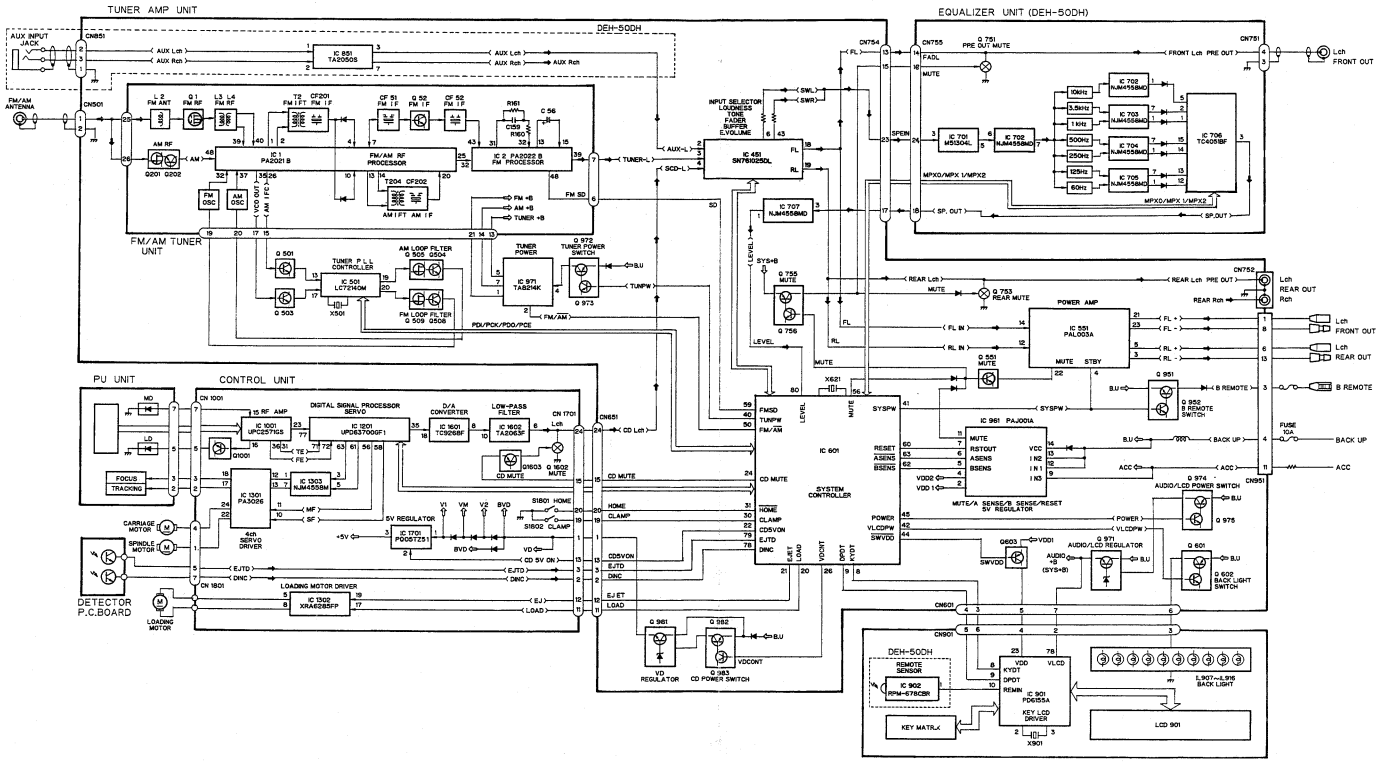

Fig.9

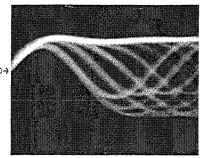
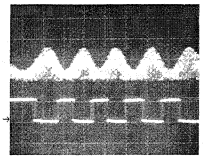
● Waveforms

Note: 1. The encircled numbers denote measuring pointes in the circuit diagram.
2. Reference voltage
REFO: 2.5V

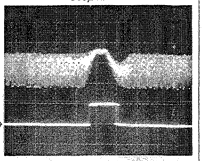
① RFO 0.5V/div. 0.2μs/div.
Normal mode: play



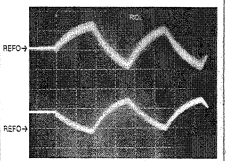
① CH1: RFO 1V/div. 0.5ms/div.
② CH2: MIRR 5V/div.
Test mode: Tracking open



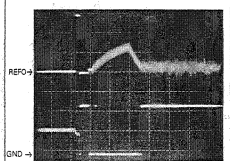
① CH1: RFO 1V/div. 0.5ms/div.
② CH2: MIRR 5V/div.
Normal mode: The defect part passes 800μm.



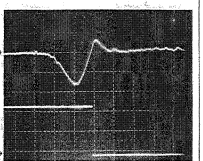
③ CH1: FIN 0.5V/div. 0.2s/div.
④ CH2: FO+ 2V/div.
Test mode: No disc, Focus close



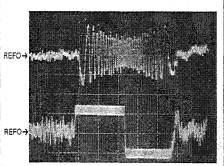
③ CH1: FIN 0.5V/div. 0.2s/div.
⑤ CH2: FOK 2V/div.
Normal mode: Focus close



⑥ CH1: FEY 0.5V/div. 1ms/div.
⑦ CH2: XSO 2V/div.
Normal mode: Focus close



⑧ CH1: TEY 0.5V/div. 0.5ms/div.
⑨ CH2: TIN 0.5V/div.
Test mode: 32 track jump (FWD)



⑧ CH1: TEY 0.5V/div. 0.5ms/div.

Adjusting Volume and Tone

Parts Identification

Fig. 24
[1] Volume/Audio adjustment
[3] Shift
[4] Adjustment
[5] Disc insertion slot
[6] Display
[7] Eject
[9] Attenuator
[15] Source selector/AUX ON/OFF

Switching Power On

Radio
Press button [15] to switch the tuner power on. Press button [15] again to switch the power off.

CD
When a disc is inserted in the Disc insertion slot [5], it is loaded and starts playing automatically. The disc is ejected by pressing button [7].

Changing the source

If button [15] is pressed while a disc is inserted, the source is changed in the following order:
CD → Radio → OFF
If other audio equipment is connected to the external input terminal using a commercially available 3.5ø miniplug, perform the following operation to turn AUX ON. Pressing button [15] for 2 seconds or more when the unit is ON. ("AU" is displayed in [27] on the display.)

- *If the volume of this unit and the volume (output) of the external equip-ment are high when you change to the AUX mode, sound will be emitted at an extremely high volume, with potentially dangerous consequences. Be sure to adjust the volume of both units to a low level before changing to the AUX mode.*
- *Pressing button [15] to change the source will cancel the AUX mode.*

Adjusting Audio

Press buton [1] to adjust the volume. Each press of button [3] changes the display and the function of button [1] as follows:
Volume → Fader (Balance) → Bass (Treble) → Loudness (ON/OFF)

- If no operations are performed whithin 8 seconds, adjustment modes are canceled. Make adjustments within 8 seconds.
- If the (◀) or (▶) side of button [4] is pressed when "F-" is shown on the display, it changes to "B-", and the balance can be adjusted. To switch from Balance to Fader, press the (+) or (–) side of button [1], and the display and button [1] function becomes Fader.
- When "BS" is indicated on the display, press the (▶) side of button [4] to switch to "TR". When "TR" is displayed, press the (◀) side of button [4] to switch to "BS".
- When you're adjusting fader, balance, bass or treble settings, the indicator will stop at the center setting.

Adjusting Volume
Pressing the (+) side of button [1] increases the volume, while the (–) side decreases it. (Display shows "V-00" ~ "V-30".)

- *When driving your vehicle, be sure to keep the volume of the unit set low enough to allow you to hear sounds coming from outside.*

Press button [9] to reduce the volume to 1/10 of its current setting (The "V-" display blinks.). Press button [9] again returns the volume to its original level.

Adjusting the Fader
When you press the (+) side of button [1], the front speaker volume increases gradually while the rear speaker volume decreases.
When you press the (–) side of button, the rear speaker volume increases gradually while the front speaker volume decreases. (Display shows "F-F9" ~ "F-R9".)

- *Please set "F- 0" when using 2 speaker system.*

Adjusting Balance
Pressing the (◀) side of button [4] shifts the balance to the left speaker, while the (▶) side shifts it to the right speaker. (Display shows "B-L9" ~ "B-R9".)

Adjusting Bass
Pressing the (+) side of button [1] increases bass, while the (–) side decreases bass. (Display shows "BS – 6" ~ "BS 6".)

Adjusting Treble
Pressing the (+) side of button [1] increases treble, while the (–) side decreases treble. (Display shows "TR – 6" ~ "TR 6".)

Using the Loudness Control
Pressing the (▶) side of button [4] turns the loudness function on, and "LOUD" [32] appears on the display. Pressing the (◀) side of button [4] turns it off. This loudness function supplements the insufficiency of low- and high-frequency ranges when the volume is low.

Changing the Spectrum Analyzer Display

Parts Identification

Fig. 24
[6] Display
[10] Spectrum Analyzer Display Selector

Fig. 26
[30] Spectrum Anayzer Display

Each time you press button [10], it changes to A, B, C, D and E in order.

A: Level Display
This indicates the music energy level of each frequency by the height of the bar for each band (Fig. 29).

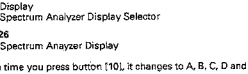

Fig. 29

B: Peak Bound Display
This indicates the music energy level of each frequency by the height of the bar for each band, while also showing a temporary indication of level peaks (Fig. 30).

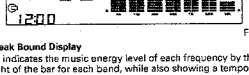

Fig. 30

C: Symmetric Display
This indicates the music energy level of each frequency by width (Fig. 31).

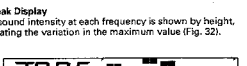

Fig. 31

D: Peak Display
The sound intensity at each frequency is shown by height, indicating the variation in the maximum value (Fig. 32).

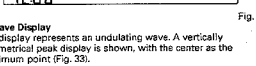

Fig. 32

E: Wave Display
The display represents an undulating wave. A vertically symmetrical peak display is shown, with the center as the maximum point (Fig. 33).

Listening to the Radio

Electronic Tuner

Frequency allocation differs depending upon the area. This unit has been designed in accordance with the frequency allocation for North America. Use in other areas will result in improper reception.

1. **Press button [15] to switch the radio power on.**
2. **Press button [14] to select a band.**

F I→F II→F III→A
(FM1) (FM2) (FM3) (AM)

3. **Use seek tuning to tune in a frequency.**
Ensure that "MANU" [31] is not indicated on the display. (If so, turn it off by pressing button [13].) Press either the (◀) side or the (▶) side of button [4].
When the (▶) side is pressed, the tuner will automatically receive high frequencies. When the (◀) side is pressed, it will automatically receive low frequencies.
4. **Adjust volume and tone.**
5. **Assign the tuned frequency to one of the buttons in Bank [8] (Preset memory).**
Press and hold down one of the buttons in Bank [8] for at least 2 seconds. The frequency is assigned to the selected button when the preset number [34] stops flashing on the display. Up to 18 FM stations (6 each for FM1, FM2 and FM3), and 6 AM stations can be assigned to the preset memory buttons in Bank [8].
6. **Once a frequency is assigned to a button in Bank [8], you just need to press that button to tune it in.**
This also causes the number of the button pressed to appear at position [34] on the display.

Manual Tuning

Use manual tuning when stations are too weak to be picked up by seek tuning.

1. Turn on "MANU" [31] by pressing button [13].
2. Each press of the (▶) side of button [4] increases the frequency in 0.2 MHz steps in the FM band, 10 kHz in the AM band. Pressing the (◀) side of button [4] decreases the frequency. Holding down either side of button [4] changes the frequency at high speed.

Adjusting Seek Sensitivity

The seek tuning function of this tuner lets you select between a local setting for reception of strong stations only, and a DX (distant) setting for reception of weaker stations. The local setting also has 4 seek tuning sensitivity levels for FM and 2 levels for AM to match local conditions.

Changing the Local Seek Sensitivity

1. Use button [14] to select a band.
2. Hold down button [12] for more than 2 seconds, and the display will show you the current local seek sensitivity for about 5 seconds.
3. While the local seek sensitivity remains on the display, press the (▶) side of button [4] to increase the sensitivity level, and the (◀) side to decrease the level as shown below.
FM : LOC1 = LOC2 = LOC3 = LOC4
AM: LOC1 = LOC2
The LOC4 setting allows reception of only the strongest stations, while lower settings let you receive progressively weaker stations.

- The display of local seek sensitivity returns to the frequency when about 5 seconds have elapsed after the change of sensitivity.

Switching between Local and DX

Press button [12] to switch between Local and DX (distant) seek tuning. When "LOC.S" [29] is shown on the display, seek tuning is performed with the local seek sensitivity. Otherwise, seek tuning is performed with the DX seek sensitivity.

Switching between FM Stereo and Mono

Generally, it is best to allow the "Super Tuner" function to automatically set the optimum listening conditions. When stereo broadcasting is received, "◁▷" [33] will appear on the display. When there is a large amount of noise, you can hold down button [13] for 2 seconds or more for clearer mono reception ("MONO" [28] will appear on the display).

BSM (Best Stations Memory)

This function automatically locates stronger stations and automatically assigns their frequencies to the buttons in Bank [8], from strongest to weakest. It comes in handy when trying to find local stations while driving.

1. Press button [14] and select a band.
2. Holding down button [11] for about 2 seconds will start BSM search. At this time, "----" will flash on the display.
3. The frequency display will return once BSM search is complete, and frequencies are assigned to buttons ① through ⑥ in Bank [8].

- At the end of the BSM search, the displayed frequency is that assigned to button ① in Bank [8].
- You can cancel BSM search by pressing button [11] again.
- *If there are fewer than 6 strong stations in the area, some of the buttons in Bank [8] will not be assigned frequencies, so they will retain any frequencies assigned to them previously.*
- *BSM search may take as long as 30 seconds in areas where there are few strong stations.*

Preset Scan Tuning

This function lets you automatically monitor the stations assigned to the preset buttons.

1. Press button [11]. The frequency will appear on the display [27] and the preset number [34] will blink. Each station assigned to the buttons in Bank [8] will be automatically tuned in for about 8 seconds.
2. When you hear a station that you like, press button [11] again to cancel preset scan tuning and remain at that station.

- Stations stored in memory under the buttons [8] but whose signal is weak will not be recalled.

Playing Compact Discs

Discs

- *Only use compact discs (optical digital audio discs) bearing the mark shown below (Fig. 34).*

COMPACT disc DIGITAL AUDIO

Fig. 34

- *Do not use cracked, scratched, or warped discs.*
- *Do not touch the disc's playing side. Handle the disc as shown below (Fig. 35).*

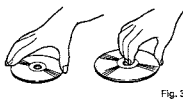

Fig. 35

- *Do not affix any label on the disc.*
- *Do not apply any vinyl record spray, antistatic agent, benzene, paint thinner, or any other volatile chemicals.*

- *Do not play a dirty disc. Use a soft cloth to clean a dirth disc as shown below. Wipe the disc outward from the center (Fig. 36).*

Fig. 36

- *Do not place the disc in high temperatures and direct sunlight.*
- *Be sure to store the disc in its case.*

CD Playing Environment

- Disc playback may be interrupted by sudden road shock.
- When the air temperature is low and the car heater is turned on, condensation on the disc and internal parts of the unit may prevent proper playback operation. If this happens, turn off the unit and wait one hour until the condensation is gone. Also, use a soft cloth to wipe off any condensation from the disc.

Parts Identification

[15] Source selector

Fig. 27

[36] Play mode display
[37] MANU
[38] Disc indicator

Listening to the CD player

1.With the labvel side up, insert a disc into [5]. Playback will start. (The track number [36] will be displayed.)

- *Do not insert the disc with the label side down. Doing so may scratch the disc.*
- If the disc stops midway while it is being inserted or if there is no playback after a disc is inserted, something may be wrong with the disc. Eject the disc and check it.

2.Adjust volume and tone.

3.Eject the disc by pressing button [7].

- *Do not leave the disc halfway into the unit as shown below. Doing so may cause the disc to be bent or dropped (Fig. 37).*

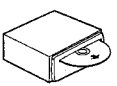

Fig. 37

Track Number Search

The track number search function lets you select a particular track on the disc you are listening to.
Check that "MANU" [37] is not lit on the display. If it is lit, turn it off by pressing button [13]. The track number [36] is incremented by pressing the (▶) side of button [4], and decremented by pressing the (◀) side. Holding either side of button [4] down changes the track number at high speed.

Using Fast Forward and Reverse

1.Press button [13] to turn on the "MANU" indication [37].
2.Press the (▶) side of button [4] to fast-forward, or the (◀) side to reverse.
- Sound can be heard while fast-forwarding or reversing.

Repeat

1.To repeat the music you are listening to, press button ② in Bank [8] ("RP" will appear on the display [36]).
2.To cancel music repeat, press button ② in Bank [8] to turn off "RP".

Random Play

1.To play music randomly, press button ③ in Bank [8] ("Rd" will appear on the display [36]). Once the current track has been played, the microprocessor will randomly select the next and subsequent tracks.
2.To cancel random play, press button ③ in Bank [8] to turn off "Rd".

- *Since selectins are played in random order, the same selection may be played twice in succession.*

Pausing

1.Press button ① in Bank [8] to pause during disc playback ("----" appears on display [36]).
2.Press button ① in Bank [8] again to release pause.
- You can select a track using the track number search during pause. ("----" is off while a track is being searched.) When the track search ends, the found track is paused at its beginning.

Error Mode

If there is a problem with CD playback, an error code will be displayed. (Ex.: "E-14") If an error is displayed, refer to the table below to identify the problem. If the error is displayed even after corrective action is taken, contact your dealer or the nearest authorized PIONEER Service Station.

D: Display
C: Cause
T: Treatment

D: E-11, 12, 14, 17, 30
C: The disc is dirty.
T: Clean the disc.

D: E-11, 12, 17, 30
C: The disc is scratched.
T: Replace the disc.

D: E-11, 14, 17
C: The disc is inserted with the label side down.
T: Insert the disc with the label side up.

D: E-14
C: An unrecorded CD-R is being used.
T: Check the disc.

D: E-10, 11, 12, 14, 17, 30, A0
C: Electrical or mechanical fault.
T: Turn off the car's ignition and turn it back on again. Or change the source to another one and then change it back to CD.

Using the Remote Control

Loading Batteries (Fig. 38)

1. Remove the battery compartment cover from the remote controller unit.
2. Load 2 batteries, whose type is UM-4, AAA or IEC R03 1.5V, as applicable, that come with the unit into the remote controller unit, ensuring that their polarity (+/–) is correct.
3. Replace the battery compartment cover.

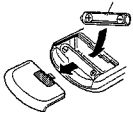

Fig. 38

Precautions When Loading Batteries

Note the following precautions when loading batteries into the remote controller unit to avoid damage due to battery fluid leakage.

- *Always check carefully that you are loading batteries with the (+) and (–) poles facing in the proper directions.*
- *Never mix old and new batteries. Always replace batteries with 2 new ones.*
- *Some batteries may appear to be identical but have different voltage ratings. Never mix battery types.*
- *Some batteries can be recharged and some cannot. Be sure to carefully read the label for the batteries you use.*
- *To avoid damage to the remote controller caused by battery leakage, remove the batteries from the remote controller if you do not plan to use it for more than one month. If you find that fluid has leaked, thoroughly wipe out the battery compartment and load a set of new batteries.*

Precautions

- *Keep the remote controller unit in an area not exposed to long periods of direct sunlight.*
- *The remote controller unit may not operate properly if the transmitter of the remote controller unit is pointed towards the floor or the seat of the vehicle.*
- *Since the transmitter employs and infrared system, it may not operate properly while car stereo unit is exposed to direct sunlight. In such a case, block the sunlight from the sensor and then perform the desired operation.*
- *If the remote controller fails to operate unless it is brought close to the unit, it may indicate that battery power is low. Replace the batteries in the remote controller.*

Parts Identification

Fig. 25

[16] Attenuator

Press to reduce the volume to 1/10 of its current setting (The "V-" display blinks.). Pressing again returns the volume to its original level.

[17] Learn

The following procedure enables the operation of a button on the unit to be memorized in this button.

1. Press button [14] for 2 seconds or more to change to the learn mode. ("LRN" is displayed.)
   - The learn mode is canceled if no operation is performed for 8 seconds.
2. Press the button on the unit that you want to operate with the remote controller.
   - Buttons [2] cannot be memorized in the Learn button.

[20] Transmitter

[21] Shift

Each time this button is pressed, the display and the function of buttons [1] and [23] change as follows:

Volume → Fader (Balance) → Bass (Treble) →Loudness (ON/OFF)

[22] Source

Pressing this button when a disc is inserted changes the source in the following order:

CD → Radio → OFF

Pressing the button for 2 seconds or more when the unit is ON switches external input "AUX" ON or OFF alternately.

[25] Volume

Press the (+) side to increase volume and the (–) side to decrease volume.

Operating Radio

[18] Band

Band changes.

[19] BSM

Hold down this button for 2 or more seconds to switch the BSM function ON and OFF.

[23] Preset Channel

Press to tune the frequencies assigned to the preset button memory. Pressing the (▲) side tunes in the ext high preset button number, while (▼) tunes in the next lower preset button number. The preset number changes at high speed when you hold either side of this button down.

[24] Seek Tuning

Press either the (◄) side or the (►) side. When the (►) side is pressed, the tuner will automatically receive high frequencies. When the (◄) side is pressed, it will automatically receive low frequencies.

Operating the CD Player

[24] Track Number Search

Press to search for a selection (track number) on the current disc. Press the (►) side to increase the track number on the display, and the (◄) side to reduce the track number. Holding down either side of this button changes the track number at high speed.

Using the Clock Display

Parts Identification

Fig. 24

[8] ① Hour adjustment
[8] ② Minute adjustment
[8] ③ Clock reset
[10] Clock

Fig. 26

[35] Clock display

Displaying the time

When the unit is ON, the clock display [35] is also always ON. Even when the unit is OFF, the clock display [35] will come ON if button [10] is pressed when the ignition key is in the ON or ACC position. Pressing button [10] again will turn the clock display [35] OFF.

Adjusting the Time

Adjusting Hour

While holding down button [10] for more than 2 seconds, press button ① in Bank [8] to adjust the hour setting. Each time button ① in Bank [8] is pressed, the hour advances by one hour. Holding down button ① in Bank [8] advances the hour at high speed.

Adjusting the Minutes

While holding down button [10] for more than 2 seconds, press button ② in Bank [8] to adjust the minute setting. Each time button ② in Bank [8] is pressed, the minute advances by one minute. Holding down button ② in Bank [8] advances the minute at high speed.

- After the minute is adjusted, the clock will start from 0 second when button [10] is released.

Adjust the clock with the "immediate clock adjustment"

Hold down button [10] for more than 2 seconds and press button ③ in Bank [8]. The time becomes "○○:00".

- If the "minute indication is 00 to 29, it is discarded, and the clock starts. (Example: If the time is "10:18", it becomes "10:00".)
- If the "minute" indication is 30 to 59, it is rounded up, and the clock starts. (Example: If the time is "10:36", it becomes "11:00".)

[19] Fader
[21] Treble
[22] Balance
[23] Bass
[26] Loudness

Switching Power On

Radio
Press button [15] to switch the tuner power on. Press button [15] again to switch the power off.

CD
When a disc is inserted in the Disc insertion slot [5], it is loaded and starts playing automatically. The disc is ejected by pressing button [7].

Changing the source

If button [15] is pressed while a disc is inserted, the source is changed in the following order:
CD → Radio → OFF

Adjusting Audio

Press buton [1] to adjust the volume. Each press of button [3] changes the display and the function of button [1] as follows:
Volume → Fader (Balance) → Bass (Treble) → Loudness (ON/OFF)

- If no operations are performed whithin 8 seconds, adjustment modes are canceled. Make adjustments within 8 seconds.
- If the (◀) or (▶) side of button [4] is pressed when "F-" is shown on the display, it changes to "B-", and the balance can be adjusted. To switch from Balance to Fader, press the (+) or (–) side of button [1], and the display and button [1] function becomes Fader.
- When "BS" is indicated on the display, press the (▶) side of button [4] to switch to "TR". When "TR" is displayed, press the (◀) side of button [4] to switch to "BS".
- When you're adjusting fader, balance, bass or treble settings, the indicator will stop at the center setting.

Adjusting Volume
Pressing the (+) side of button [1] increases the volume, while the (–) side decreases it. (Display shows "V-00" ~ "V-30".)

- *When driving your vehicle, be sure to keep the volume of the unit set low enough to allow you to hear sounds coming from outside.*

Press button [9] to reduce the volume to 1/10 of its current setting (The "V-" display blinks.). Press button [9] again returns the volume to its original level.

Adjusting the Fader
When you press the (+) side of button [1], the front speaker volume increases gradually while the rear speaker volume decreases.
When you press the (–) side of button, the rear speaker volume increases gradually while the front speaker volume decreases. (Display shows "F-F9" ~ "F-R9".)

- *Please set "F- 0" when using 2 speaker system.*

Adjusting Balance
Pressing the (◀) side of button [4] shifts the balance to the left speaker, while the (▶) side shifts it to the right speaker. (Display shows "B-L9" ~ "B-R9".)

Adjusting Bass
Pressing the (+) side of button [1] increases bass, while the (–) side decreases bass. (Display shows "BS – 6" ~ "BS 6".)

Adjusting Treble
Pressing the (+) side of button [1] increases treble, while the (–) side decreases treble. (Display shows "TR – 6" ~ "TR 6".)

Using the Loudness Control
Pressing the (▶) side of button [4] turns the loudness function on, and "LOUD" [26] appears on the display. Pressing the (◀) side of button [4] turns it off. This loudness function supplements the insufficiency of low- and high-frequency ranges when the volume is low.

[24] Local station
[25] Manual
[27] Preset number
[28] FM stereo

Listening to the Radio

Electronic Tuner

Frequency allocation differs depending upon the area. This unit has been designed in accordance with the frequency allocation for North America. Use in other areas will result in improper reception.

1. Press button [15] to switch the radio power on.
2. Press button [14] to select a band.

F1 → F2 → F3 → A
(FM1) (FM2) (FM3) (AM)

3. Use seek tuning to tune in a frequency.
Ensure that "MANU" [25] is not indicated on the display. (If so, turn it off by pressing button [13].) Press either the (◀) side or the (▶) side of button [4].
When the (▶) side is pressed, the tuner will automatically receive high frequencies.
When the (◀) side is pressed, it will automatically receive low frequencies.
4. Adjust volume and tone.
5. Assign the tuned frequency to one of the buttons in Bank [8] (Preset memory).
Press and hold down one of the buttons in Bank [8] for at least 2 seconds. The frequency is assigned to the selected button when the preset number [27] stops flashing on the display. Up to 18 FM stations (6 each for FM1, FM2 and FM3), and 6 AM stations can be assigned to the preset memory buttons in Bank [8].
6. Once a frequency is assigned to a button in Bank [8], you just need to press that button to tune it in.
This also causes the number of the button pressed to appear at position [27] on the display.

Manual Tuning

Use manual tuning when stations are too weak to be picked up by seek tuning.
1. Turn on "MANU" [25] by pressing button [13].
2. Each press of the (▶) side of button [4] increases the frequency in 0.2 MHz steps in the FM band, 10 kHz in the AM band. Pressing the (◀) side of button [4] decreases the frequency. Holding down either side of button [4] changes the frequency at high speed.

Adjusting Seek Sensitivity

The seek tuning function of this tuner lets you select between a local setting for reception of strong stations only, and a DX (distant) setting for reception of weaker stations. The local setting also has 4 seek tuning sensitivity levels for FM and 2 levels for AM to match local conditions.

Changing the Local Seek Sensitivity

1. Use button [14] to select a band.
2. Hold down button [12] for more than 2 seconds, and the display will show you the current local seek sensitivity for about 5 seconds.
3. While the local seek sensitivity remains on the display, press the (▶) side of button [4] to increase the sensitivity level, and the (◀) side to decrease the level as shown below.
FM : LOC1 = LOC2 = LOC3 = LOC4
AM : LOC1 = LOC2
The LOC4 setting allows reception of only the strongest stations, while lower settings let you receive progressively weaker stations.
- The display of local seek sensitivity returns to the frequency when about 5 seconds have elapsed after the change of sensitivity.

Switching between Local and DX

Press button [12] to switch between Local and DX (distant) seek tuning. When "LOC.S" [24] is shown on the display, seek tuning is performed with the local seek sensitivity. Otherwise, seek tuning is performed with the DX seek sensitivity.

Switching between FM Stereo and Mono

Generally, it is best to allow the "Super Tuner" function to automatically set the optimum listening conditions. When stereo broadcasting is received, "⊙" [28] will appear on the display. When there is a large amount of noise, you can hold down button [13] for 2 seconds or more for clearer mono reception ("MONO" [18] will appear on the display).

BSM (Best Stations Memory)

This function automatically locates stronger stations and automatically assigns their frequencies to the buttons in Bank [8], from strongest to weakest. It comes in handy when trying to find local stations while driving.
1. Press button [14] and select a band.
2. Holding down button [11] for about 2 seconds will start BSM search. At this time, "----" will flash on the display.
3. The frequency display will return once BSM search is complete, and frequencies are assigned to buttons ① through ⑥ in Bank [8].
- At the end of the BSM search, the displayed frequency is that assigned to button ① in Bank [8].
- You can cancel BSM search by pressing button [11] again.
- *If there are fewer than 6 strong stations in the area, some of the buttons in Bank [8] will not be assigned frequencies, so they will retain any frequencies assigned to them previously.*
- *BSM search may take as long as 30 seconds in areas where there are few strong stations.*

Preset Scan Tuning

This function lets you automatically monitor the stations assigned to the preset buttons.
1. Press button [11]. The frequency will appear on the display [17] and the preset number [27] will blink. Each station assigned to the buttons in Bank [8] will be automatically tuned in for about 8 seconds.
2. When you hear a station that you like, press button [11] again to cancel preset scan tuning and remain at that station.
- Stations stored in memory under the buttons [8] but whose signal is weak will not be recalled.

Playing Compact Discs

Discs

- *Only use compact discs (optical digital audio discs) bearing the mark shown below (Fig. 50).*

COMPACT disc DIGITAL AUDIO

Fig. 50

- *Do not use cracked, scratched, or warped discs.*
- *Do not touch the disc's playing side. Handle the disc as shown below (Fig. 51).*

Fig. 51

- *Do not affix any label on the disc.*
- *Do not apply any vinyl record spray, antistatic agent, benzene, paint thinner, or any other volatile chemicals.*

- *Do not play a dirty disc. Use a soft cloth to clean a dirth disc as shown below. Wipe the disc outward from the center (Fig. 52).*

Fig. 52

- *Do not place the disc in high temperatures and direct sunlight.*
- *Be sure to store the disc in its case.*

CD Playing Environment

- Disc playback may be interrupted by sudden road shock.
- When the air temperature is low and the car heater is turned on, condensation on the disc and internal parts of the unit may prevent proper playback operation. If this happens, turn off the unit and wait one hour until the condensation is gone. Also, use a soft cloth to wipe off any condensation from the disc.

Listening to the CD player

1.With the labvel side up, insert a disc into [5]. Playback will start. (The track number [30] will be displayed.)

- *Do not insert the disc with the label side down. Doing so may scratch the disc.*
- If the disc stops midway while it is being inserted or if there is no playback after a disc is inserted, something may be wrong with the disc. Eject the disc and check it.

2.Adjust volume and tone.

3.Eject the disc by pressing button [7].

- *Do not leave the disc halfway into the unit as shown below. Doing so may cause the disc to be bent or dropped (Fig. 53).*

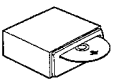

Fig. 53

Track Number Search

The track number search function lets you select a particular track on the disc you are listening to.
Check that "MANU" [31] is not lit on the display. If it is lit, turn it off by pressing button [13]. The track number [30] is incremented by pressing the (►) side of button [4], and decremented by pressing the (◄) side. Holding either side of button [4] down changes the track number at high speed.

Using Fast Forward and Reverse

1.Press button [13] to turn on the "MANU" indication [31].
2.Press the (►) side of button [4] to fast-forward, or the (◄) side to reverse.
- Sound can be heard while fast-forwarding or reversing.

Repeat

1.To repeat the music you are listening to, press button ② in Bank [8] ("RP" will appear on the display [30]).
2.To cancel music repeat, press button ② in Bank [8] to turn off "RP".

Random Play

1.To play music randomly, press button ③ in Bank [8] ("Rd" will appear on the display [30]). Once the current track has been played, the microprocessor will randomly select the next and subsequent tracks.
2.To cancel random play, press button ③ in Bank [8] to turn off "Rd".
- *Since selectins are played in random order, the same selection may be played twice in succession.*

Pausing

1.Press button ① in Bank [8] to pause during disc playback ("----" appears on display [30]).
2.Press button ① in Bank [8] again to release pause.
- You can select a track using the track number search during pause. ("----" is off while a track is being searched.) When the track search ends, the found track is paused at its beginning.

Error Mode

If there is a problem with CD playback, an error code will be displayed. (Ex.: "E-14") If an error is displayed, refer to the table below to identify the problem. If the error is displayed even after corrective action is taken, contact your dealer or the nearest authorized PIONEER Service Station.

D: Display
C: Cause
T: Treatment

D: E-11, 12, 14, 17, 30
C: The disc is dirty.
T: Clean the disc.

D: E-11, 12, 17, 30
C: The disc is scratched.
T: Replace the disc.

D: E-11, 14, 17
C: The disc is inserted with the label side down.
T: Insert the disc with the label side up.

D: E-14
C: An unrecorded CD-R is being used.
T: Check the disc.

D: E-10, 11, 12, 14, 17, 30, A0
C: Electrical or mechanical fault.
T: Turn off the car's ignition and turn it back on again. Or change the source to another one and then change it back to CD.

Using the Clock Display

Parts Identification

[29] Clock display

Displaying the time

When the unit is ON, the clock display [29] is also always ON. Even when the unit is OFF, the clock display [29] will come ON if button [10] is pressed when the ignition key is in the ON or ACC position. Pressing button [10] again will turn the clock display [29] OFF.

Adjusting the Time

Adjusting Hour

While holding down button [10] for more than 2 seconds, press button ① in Bank [8] to adjust the hour setting. Each time button ① in Bank [8] is pressed, the hour advances by one hour. Holding down button ① in Bank [8] advances the hour at high speed.

Adjusting the Minutes

While holding down button [10] for more than 2 seconds, press button ② in Bank [8] to adjust the minute setting. Each time button ② in Bank [8] is pressed, the minute advances by one minute. Holding down button ② in Bank [8] advances the minute at high speed.

- After the minute is adjusted, the clock will start from 0 second when button [10] is released.

Adjust the clock with the "immediate clock adjustment"

Hold down button [10] for more than 2 seconds and press button ③ in Bank [8]. The time becomes "○○:00".

- If the "minute indication is 00 to 29, it is discarded, and the clock starts. (Example: If the time is "10:18", it becomes "10:00".)
- If the "minute" indication is 30 to 59, it is rounded up, and the clock starts. (Example: If the time is "10:36", it becomes "11:00".)
